60 DAYS PURE CURED

Located in Seattle's historic Georgetown neighborhood, in the shadow of Being Field's final approach, Jet City Gardens is a family owned micro-batch, premium cannabis cultivator. While other growers schedule takeoff immediately after harvest, we put our products in a holding pattern for sixty days because...

WE'RE ALL ABOUT THE CURE

At Jet City Gardens, we're convinced that only an extended cannabis cure will allow the complete taste and aroma to emerge. The result - the elevated level of flavor, consistency and smokeability cannabis aficionados expect from a top shelf product.

A DISTINCTIVELY SMOOTH SMOKE

Growers typically harvest quickly and use the word "cure" loosely, only drying the product to get the fastest turnaround possible. Problem is, ready to sell doesn't mean ready to smoke. Our prolonged curing technique breaks down remaining chlorophyll in the buds. Chlorophyll, although a vital component for photosynthesis, contains magnesium, which causes smoke to be harsh. We've discovered that slow curing significantly minimizes this effect.
